— Multisynaptic

— Shortcut (replay)

- - - Shortcut (random)

..... Chance

Episodic memories

*Person × Place × Time × Animal
categorical table
(Bob & Jenny example, sketch)*

Consolidation model

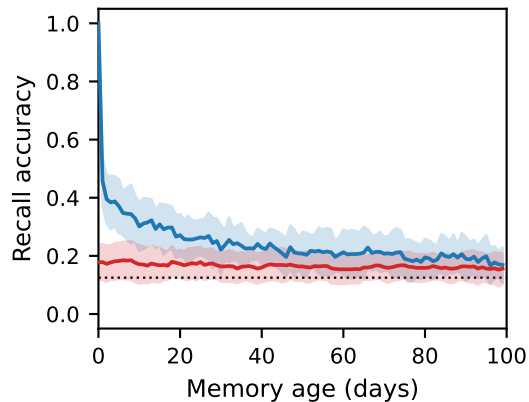

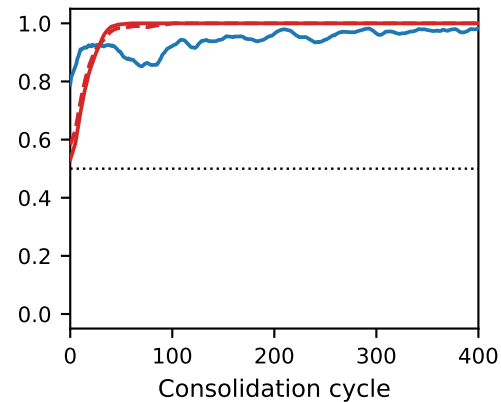

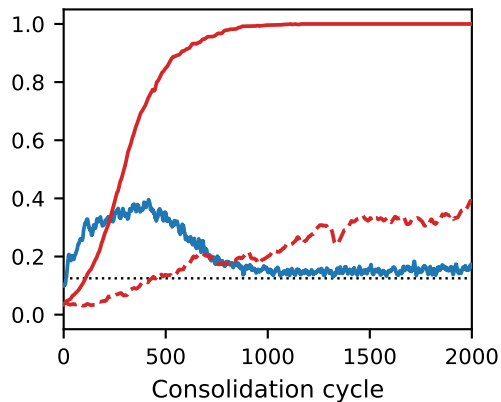

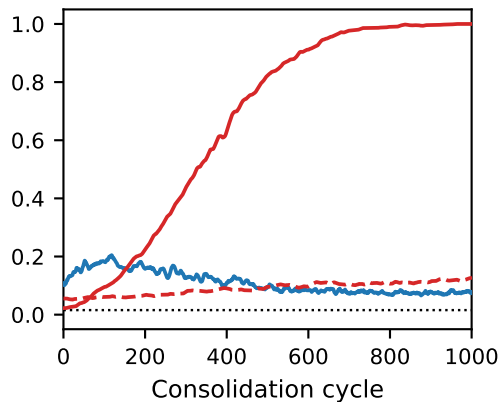

*Day: indirect pathway
stores new episodes
Night: replay / random
drives shortcut learning*

Shortcut motif

*DAE-style reconstruction
of a corrupted memory item
via the two pathways*

D**Evaluation**

*Corrupt one variable,
ask each pathway
to reconstruct it
(train + test sets)*

E**Context memory lifetime****F****Simple rule (2 × 2)****G****Intermediate rule (32 × 8)****H****Complex rule (32 × 64)****I****Rule complexity sweep**
